ART SUPPLIES

- ◆Swarovski Crystals
- ◆Mixing jars
- ◆Measuring scoop
- ◆99% Isopropyl Alcohol

INSTRUCTIONS

1. P.R.E.P. the natural nail and apply a CND Clear Tip. Apply a thin base layer of Retention+ Clear Sculpting Powder and finish with the 180 side of the Hot Shot File. (For details, see our "Liquid & Powder Enhancements Sculpted on a Tip" Step-by-Step.)
2. Mix Retention+ Sculpting Powder and Additives in mixing jars to create the design's colors. Cap jars and shake thoroughly to blend. To maintain the integrity of the enhancement never mix more than 30% Additives to any powder blend.
3. Silver - 4 parts Retention+ Sculpting Powder Clear - 1/2 part Additives Silver Frost Pigment Effect - 1/2 part Additives Icicles Effect
4. Gold - 4 parts Retention+ Sculpting Powder Clear - 1 part Additives Gilded Gleam Pigment Effect
5. Apply Silver powder to both sides of the nail, leaving a line down the center and at the cuticle area free of product.
6. Apply Gold powder down the center of the nail and at the cuticle.
7. Lightly smooth the enhancement with the 180 side of the Hot Shot File, without disturbing the design.
8. Remove any dust with a plastic-backed pad saturated with 99% Isopropyl Alcohol.
9. Apply a thin layer of Brisa Gloss. DO NOT CURE.
10. Apply a Swarovski crystal at the cuticle area and cure for two minutes in the CND UV Lamp.
11. Wipe with 99% Isopropyl Alcohol to remove top film.
